Senior Product Manager, Data

WORK EXPERIENCE

Charles Schwab

06/2018 - Present

Software Development Manager

Denver, Colorado, United States

- Led Agile software development teams through sprint planning, retrospectives, and backlog grooming, ensuring alignment with strategic product goals and on-time delivery
- Owned and maintained Advanced Roadmaps and Confluence planning artifacts to provide clear visibility into release schedules, team capacity, and long-term product initiatives
- Built and maintained automation tooling for software release instructions, integrating JIRA workflows, documentation, and deployment guidance to eliminate errors and accelerate handoffs.
- Developed Schwab's modern verification backend system from scratch to production responsible for vetting client's NPI data for potential risks of identity theft and fraud.
- Championed JIRA project organization best practices, creating custom boards, filters, and automation rules to improve team velocity and clarity of work
- Collaborated cross-functionally with product and business owners to translate stakeholder needs into actionable user stories, technical documentation, and implementation plans
- Built, migrated and maintained the CI/CD pipelines for 10 API and messaging applications in 5 environments (dev,qa,performance,uat,production)
- Coded custom dashboards, alerts, and queries in Splunk providing the company key business and technical insights into fraud and identity data as well as the monitoring of application health, traffic distribution, performance, volume, sub-process times, peak load, exception breakdown, and log tracing.
- Managed and migrated technologies, including JIRA, Java 17, Maven, Gradle, Pivotal Cloud Foundry, Spring Boot 3, IntelliJ, Bamboo, MongoDB, GIT, Confluence, SQL, JQL, JSON, RabbitMQ.

IBM

03/2016 - 06/2018

Developer

Monroe, Louisiana

- Creating automated processes for web service frameworks with REST and SOAP standards by providing code-writing-code software. Supplementing it with hotfixes, brand new features, and new methods for filing .pom/bean snippets, schema/domain .xsd/.wsdl files, .java files, and comment stamps into developers local workspace.
- Reduced the number and severity of web service timeouts by over 1000% returned by VCSR empirically by measuring volume to our dependencies. The issue was a significant pain point for our team and our customers with numerous critical calls being circulated encompassing the same problem with no resolution upon onboarding.
- Documented and presented high-level system architecture and structure for DVAR-OM web services. Including macro/micro philosophies, application layers, tool belts, message schema outlines, Venn diagram encapsulation, service discovery through registration, DB modes and fallout, task management, cross-application integration, code generation, modular dependencies, global functionality, environment configurations, Splunk data listener, and agile, iterative development.
- Technical lead, covering development, maintenance, and support for a suite of web applications vital to customer order flow and the provisioning of telecommunication service lines.
- Partnered with architects, managers, systems analysts, product owners, scrum masters, developers, testers, dbas, product owner partners, and directors to drive business.

Great-West Financial

04/2015 - 11/2015

Developer

Greenwood Village

- Utilized Thunderhead software and existing integrated Business Object to code the front-end of database-driven retirement letters based on business requirements.

- Completed over 75 independent projects during the duration of tenure in a waterfall development environment. Assembled documents by creating projects within Thunderhead's Business Content studio, linked individual projects to a business object based on an XML schema and combined static fragments, links to shared content, images, tables, conditional if-then and for-loop statements, and dynamic scripts.

Stonebridge Companies

11/2013 - 03/2015

Server

Greenwood Village

Ivy at the Glenn

05/2012 - 11/2013

Server

Littleton, Colorado

Charles Schwab

02/2010 - 11/2011

Voice Analyst

Greenwood Village, Colorado

- Coded continual improvements to the front-end of Schwab's IVR (Interactive Voice Response) system, coding interactive voice menus with VXML based on business requirements.
- Pioneered and built a prototype voice application for Schwab's Retirement Plan Services (RPS) using technologies like JSP, VXML, IBM WebSphere Application Server, and Oracle SQL database. The model led to the approval of funding a large-scale scratch IVR application.
- Produced and demonstrated another prototype iPhone application using Cocoa to exhibit the ability to use voice response in iPhone/iOS applications.
- Connected back-end data through front-end VXML to the customer using SOAP web services.

Hewlett-Packard

06/2009 - 06/2010

Intern

Fort Collins, Colorado Area

- Implemented automated JUnit unit testing tool to validate both pre-written unit tests and source code build using Cruise Control software, Microsoft Visual Studio 2005, Tortoise SVN, and XML scripts.

EDUCATION

Bachelor's degree in Computer Science

Colorado State University

01/2006 - 12/2009

Heritage High School • GPA: 4.0/6

01/2001 - 12/2005

Graduated with High Honors

CERTIFICATIONS

AWARDS & SCHOLARSHIPS

Manager's Choice Award Mark Hopkins	11/2017
Service Excellence Award Geneva Durbin	11/2017
Service Excellence Award Brien Louque	10/2016

PROJECTS

Self Remedy Self Remedy business functionality will allow clients to self resolve verification related issues by way of identification document verification.	01/2020 - Present
Enhanced Client Verification The ECV Platform provides real-time identity verification and risk assessment services of Schwab clients across multiple lines of business and channels. The platform will consist of a collection of enterprise ready utility services that may be used across Schwab domains for both new and existing clients.	03/2018 - Present
CRIS to Ensemble Billing system merger.	03/2016 - Present
Flow Through Solutions Flow Through Solutions is a web application suite architected to provide smooth customer order flow and provisioning.	06/2017 - 03/2018

VOLUNTEERING & LEADERSHIP

United Way of Northeast Louisiana Reader Volunteer reading opportunity for elementary students.	11/2016 - 03/2018
St. Andrew's United Methodist Church Volunteer Aided in construction of a new school building in Belize.	07/2006 - 07/2006

SKILLS

Agile Methodologies, Automation, Bash, BASIC, CLI, Continuous Integration, CSS, Customer Service, Debugging Code, Git, HTML5, Hyperledge Composer Modeling Language, Java, JavaScript, JUnit, Leadership, Lisp, Mac OS, Maven, MongoDB, Multithreading, MVC Architecture, OPENQASM, Pro Tools, Python, Quantum, RabbitMQ, Rally, Representational State Transfer (REST), RESTful WebServices, Spring Framework, SQL, Test Driven Development, Unix, VXML, Windows, XML
